FERN SOCIETY OF VICTORIA Inc.

POSTAL ADDRESS: P.O. Box 45, Heidelberg West, Victoria, 3081
Email: barry_white1@msn.com.au
Web: http://home.vicnet.net.au/~fernsvic/

Our Society's Objectives.

The objectives of the Society are:

- *to bring together persons interested in ferns and allied plants*
- *to promote the gathering and dissemination of information about ferns*
- *to stimulate public interest in ferns and*
- *to promote the conservation of ferns and their habitats.*

OFFICE BEARERS:

	<u>PHONE:</u>	<u>EMAIL:</u>
President:	Barry Stagoll	9844 1558
Imm. Past President		mirra@iimetro.com.au

COMMITTEE MEMBERS:

Gay Stagoll 9844 1558, Norma Hodges 9878 9584. Brenda Girdlestone 9390 7073, Mirini Lang 9886 6109
Milton Edwards 9655 5335, Robin Wilson 9597 0742.

SUBSCRIPTIONS:

*Single	\$17.00	*Pensioner/student	\$14.00	*Family	\$19.00
*Pensioner Family	\$16.00	*Organisation	\$19.00		
*Overseas	\$25.00 (Payment by international bank cheque in \$A please. Sent by Airmail.)				

***Subscriptions fall due on 1st July each year.**

MEETING VENUES:

The Kevin Heinze Garden Centre at 39 Wetherby Road, Doncaster (Melway 47; H1).
Other meetings at members' gardens or as advertised on the following page.

Opinions expressed in this newsletter are the personal views of the authors and are not necessarily endorsed by the Society, nor does mention of a product constitute its endorsement.

Timetable for evening general meetings:

7.30	Pre-meeting activities - sale of ferns. Spore, books, merchandise and special effort tickets. Also library loans and lots of conversation.
8.00	General meeting
8.15	Workshops and demonstrations.
9.15	Fern identification and pathology, special effort draw.
9.45	Supper and another good yarn.
10.00	Close.

CALENDAR OF EVENTS 2008

DECEMBER MEETING

Sunday the 7th, our Christmas break up will be held at the Kevin Heinze Centre, Wetherby Rd, Doncaster.

This will be our annual last gathering for the year and will be a Christmas lunch, starting at 11.30am. Lunch will be supplied to members free, but we do ask for members to bring a plate of afternoon tea which can be shared.

Due to catering requirements if you are intending to attend this function, and as yet not informed Norma can you please do so on **9878 9585** before the 20th November.

Guests and visitors are most welcome to participate however due to catering costs there will be a charge of \$10.00 per non members, please let Norma know if you are intending to bring along a guest.

You will need to bring along with you cutlery, plates and a cup, tea and coffee will be supplied, if you require anything else to drink please bring it with you

After lunch we will be running our blind auction, so if you have something that you would like to donate to the society for this purpose please bring it along with you, if possible wrapped (Christmas paper of course). This is always a lot of fun and can be a bargain or two to be had. Half of the money raised is donated to the Kevin Heinze Centre, so bring along some money.

There will be some ferns for sale so those members who are unable to attend meetings during the year, this is your chance to add to your collection. This is also a good chance for members to roam around the gardens of the centre.

This is our last meeting for the year and our next meeting will not be until February 2009.

We look forward to seeing as many members as possible.

PRESIDENTIAL PERORATION

Soon after the last Newsletter went out, unfortunately we received the very distressing news that sadly our member (and Committee member) Milton Edwards had passed away following a short illness. Commiserations were conveyed to Wendy and her family on behalf of the Society. Subsequently, we have tried to be of assistance in finding buyers for the large number of ferns that Milton had collected and those he had been raising. Those FSV members who we could contact readily were invited to a sale afternoon early in October; others visited separately; and we also purchased some for FSV for Special Effort prizes at meetings and to on-sell at the Kevin Heinze Centre's Spring Fair. We're hoping that by this time fern retailers introduced by us may have purchased more of the stock. Wendy and her sons are keen to sell as much of the stock as possible before the warm weather arrives as they know that they will be unable to look after the ferns. Any members who may be interested in helping to give them a home should contact any Committee member, and we'll try to set up a mutually suitable time to facilitate this.

Keith Hutchinson (past Committee member and President who continues as a stalwart of the Society) fronted at our September meeting, not long after throat surgery, to show us the wide variety of succulents that he grows and give a most interesting explanation of this group of plants and how to cultivate them. The competition fern category of *Pyrrosia* also brought in some very nice entries.

Our Open Garden at home on the Grand Final weekend went well, with a small smattering of visitors showing interest in ferns, and two copies of the Ferns DVD sold.

We had another meeting focussing on a subject other than ferns in October, when Colin Cleak brought along some really fine cymbidium orchids and gave a highly entertaining and expert explanation about cymbidiums and how to grow them to perfection. Colin has been growing cymbidiums for only 6 years, but over this time has built up a huge collection and has been successful at capturing first prizes at many shows (including winning national champion awards). He explained that he had achieved his expertise through membership of the Cymbidium Orchid Society, which concentrates its efforts on helping members to learn the practical aspects of growing cymbidiums successfully. Colin also showed us slides of the houses he's built both for his orchids and his ferns, all filled with really nice-looking plants. The fern collection includes numerous large specimens of different *Platyceriums*, a genus of particular interest to Colin.

With their agreement, we're hoping to arrange a Fern Society visit to Colin and Noelle's home in Nagambie next spring, to give members an opportunity to enjoy their cymbidium and fern collections in person.

We also had a good selection of very nice *Blechnums* exhibited, and as usual a discussion about these led by Barry White. Thanks to the exhibitors.

The October meeting also incorporated our Annual General Meeting. There being no fresh nominations for Committee, the meeting confirmed all current members to continue on Committee, and likewise all office-bearers. On my own behalf, and those of the other members of Committee, I thank Society members for their continued confidence in us. However, under the Rules of the Society there are several Committee places unfilled at present. We could certainly do with extra participants on Committee to help in the running of the Society. In particular, just at the present we seek a member willing to take on the role of Newsletter Editor. Brenda Girdlestone - who we've been grateful to have as a willing Editor for some time now - has consented to remain a Committee member but fore-shadowed that due to the demands of her job she will look to discontinue her role as Editor in the short term.

continued page 85

Continued from previous page

The Newsletter is vital as our main form of contact with members. We're very keen to hear from any member who would like to consider volunteering to become Newsletter Editor - ideally someone who has a computer with internet access and a good working knowledge of word processing and digital photo handling. Naturally, we'll provide whatever extra training and assistance might be necessary to help a new Editor take control. We also owe thanks to Bernadette (Bernie) Thomson, for again auditing the FSV accounts (and saving us the expense of using an non-member as auditor). Bernie was reappointed as auditor for the current year. However, she's indicated that she would like a rest from the audit, and we'd very much appreciate hearing from any member who might be prepared to take over this task (it's not a really lengthy job, as the accounts are fairly simple as you'd expect - just requires a modest level of book-keeping knowledge).

A few of us staged a FSV stall at the KHC Spring Fair in mid October - it was nice to find some of the patrons asking questions about ferns and buying them. Having not staged Fern Shows for a couple of years (and not intending to do so again in 2009) this sort of event at least provides a small opportunity to promote ferns. We have been in consultation with the Ferny Creek Horticultural Society about the possibility that we may be able to participate in one of the shows they stage each year at their Mount Dandenong garden, which might provide another opportunity of somewhat larger dimensions in the future - involving far less exertion (and also financial risk) than attempting to stage a full-scale show ourselves. In the meantime we owe our gratitude to Norma and John Hodges who are going to "show the flag" for FSV (again) at the Marysville Flower Festival to be held on the weekend of November 1 & 2, taking along two carfulls of their magnificent ferns for the display.

For our next meeting, the focus will be on Adiantums. Chris Goudey will talk about them when we visit Chris and Lorraine Goudey at their home in Lara on Saturday 1st November (details in the upcoming events list). This should be a rewarding and interesting meeting, and we hope lots of members can make it. There'll be no evening meeting for November at the Kevin Heinze Centre, with our only activity there in what's left of 2008 the Christmas lunch on Sunday 7th December. Please don't forget that RSVP for the lunch is required by Norma Hodges by 15th November.

As usual I take this opportunity to wish all those members who we may not see in the period leading up to Christmas and the start of the New Year all the best for the Festive Season. We'll hope to have plenty of members join in our 2009 activities - details of the activities arranged for early 2009 are also provided elsewhere in this Newsletter.

Barry Stagoll

MEMBERSHIP REMINDER

For those members who have not as yet paid their annual membership, could you please do so by using the form located in last issue's newsletter.

If you missed the membership form then please ring Don Fuller on 9306 5570.

Thank you for your prompt payment.

FORTHCOMING EVENTS

January 2009

No meeting is held this month.

February 2009

Thursday the 19th is our first meeting in 2009, is to be a talk by Don Fuller on Lastreopsis ferns.

Our competition for the night will be Lastreopsis, Tectaria, Cyrtomium ferns

March 2009

Thursday the 19th will be a talk by Gay and Barry Stagoll on ferns of Western Australia

Competition is a Pteris fern

April (Good Friday 10th)

Thursday the 16th will be a fern forum led by Don Fuller, this is a night where you can bring along a favourite fern or a problem fern and the meeting will talk about it. This will be a group discussion, and is a great way to learn more about ferns that other members are growing.

Competition is any fern.

During this month we are expecting to have the company of about 20 members from the British Pteridological Society visiting our fair shores, and there is a strong possibility that they may be in Victoria at the time of our meeting. If so, the committee is hoping that they may be in attendance for this meeting. Venue and dates may vary but full details will be published in forthcoming newsletter as details are confirmed.

Our British co – fernies are in the process of organizing an overnight stay possibly in the Otways, and an invitation has been extended to our members who would like to accompany them on this trip, would be most welcome. Again further details will be published in the forthcoming newsletters as details are confirmed.

Our British visitors on leaving Melbourne are planning on going to New South Wales, then onto Queensland. It has been suggested that any members who are interested may also go along on this extended trip. Again further details will be published as they become available.

May

Thursday the 21st will be a forum on the family Polypodiaceae. This will be a group discussion on the ferns that are brought in on the night.

Competition will be Polypodium fern or any other members of the family.

continued page 87

August

Thursday 20th Barry Stagoll will give a talk on the ferns of China

October

In October an excursion will be held to Colin Cleak's orchids and ferns in Nagambie

December

Sunday 6th Christmas lunch and break up

The above is only proposed and is subject to change, all changes and confirmation will be printed in forthcoming newsletters as they become available.

NEWSLETTER EDITOR

The time has come for us to start looking for a new editor!
Unfortunately work commitments have become such, that finding the time needed to dedicate to putting the newsletter out on time, is getting more difficult especially at this time of the year. I feel now would be a good time to hand over to someone else to have a go.

The new editor will find that lots of people are willing to help, making the job easier. So have a think about this and if you think you might be interested and want more information please don't hesitate to talk to me.

As the newsletter is an important communication tool for the societies survival I will continue in this position until we find someone to hand it over to.

Ed

Reminder of Goods for sale to members

The fern society has bulk purchased the following items for resale to members.

Maxicrop	\$8.00 per litre
Labels 90m	\$3.00 for 50
Labels 135m	\$2.00 for 25
Pilot pens fine	\$3.00 each
Pilot pens ultra fine	\$3.40 each
Pencils (stable for labels)	\$2.60 each

Available at each meeting or by contacting
Don Fuller on 9306 5570.

DRYNARIA

A GROWERS POINT OF VIEW

Ron Robbins

ronrobbins@optusnet.com.au

As a keen collector and grower of Drynarias, I've decided to put my procedure and views to paper, whether they be right or wrong, they work for me giving excellent results.

The growing season here in Adelaide appears to begin around the month of October at this time old fronds would be deciduated or browned off and should be removed allowing new growth buds and fronds to progress freely.

During this period I top up my baskets as required, with an epiphytic mix supplemented with one of the following, Dynamic Lifter, Rapid Raiser, Ultraflora 2000 or a similar fertilizer. If the fern needs re-basketing this is the time to do it, using an epiphytic mix laced with one of the above mentioned fertilizers. I then dunk the ferns in an old tub filled with water, to which I add Fish Emulsion or Nitrosol or similar. The baskets are totally immersed for 10-15 minutes, removed, drained and hung in a well lit position with good air movement.

The ferns should grow on to become a healthy and attractive specimen by mid to late November or early

December with large fronds. Care should be taken when ferns have their new growth, because at this stage the fronds are quite tender and brittle, if mis-handled they could snap or break easily.

Mid to late December, the ferns should be flourishing and by now will be quite hardy with some signs of new growth appearing. As January progresses the ferns should be full and well developed, at this time I give a dose of fertilizer, Dynamic Lifter or similar to ensure that they will have enough nourishment to last for the rest of their growing season.

You will find on "well established" ferns that through January to March and at times into April, there could be some new growth appearing. This of course will depend on the climatic conditions at the time. With a late and humid summer there could be astonishing results in growth, but whatever the conditions, from November through to April, you should still be rewarded with **excellent ferns to admire**.

The ferns, I find prefer a well lit position with an Easterly to North Western aspect, although this is not altogether necessary. They require plenty of air circulation and common sense watering and remembering that their habitat is Tropical to Semi Tropical. In nature they can be deluged in the wet season with copious quantities of rain, but being epiphytic they would only retain the amount they require. To simulate these conditions, they should be monitored and watered to suit these requirements. In exceptionally hot weather, this could be twice daily, or a little but often, not heavy watering, but an amount to keep the fern damp.

It should be noted that it is not advisable to excessively water overhead (as we could be prone to do during a hot spell) this tends to weigh down the fronds, causing them to fold or crease, and they will eventually die off.

Drying out over a short period doesn't seem to cause damage, but undue dryness under exceptionally hot conditions could be damaging. Drying out in the winter would be advisable as this is their dormant period, but this should also be monitored.

continued page 89

Multicrop
Maxicrop

Australia's original liquid SEAWEED plant food concentrate

- Stimulates vigorous root development
- Builds resistance to insect and fungal attack
- Enhances fruit and flower formation
- Non burning, easy to use on all plants
- Minimise transplanting shock
- Harden plants during periods of stress
- Establishes plants quickly after planting or transplanting

Multicrop & Maxicrop products are available at all leading garden supply outlets.

PROUDLY AUSTRALIAN OWNED
MULTICROP

DRYNARIA

Remember that information gained, whether it be from books, articles or verbally, should be considered, but the knowledge used at the discretion of the grower. Conditions such as position, light, atmospheric conditions, geographical position and growing medium are all important factors this brings into calculation one more condition, the human element. It is up to you as the grower to use your own findings to a certain degree, by trying to simulate the natural requirements of this fern, if you do so and abide by your findings, you can only succeed in growing excellent specimens.

Please remember we cannot duplicate Mother Nature, but we sure can simulate her.

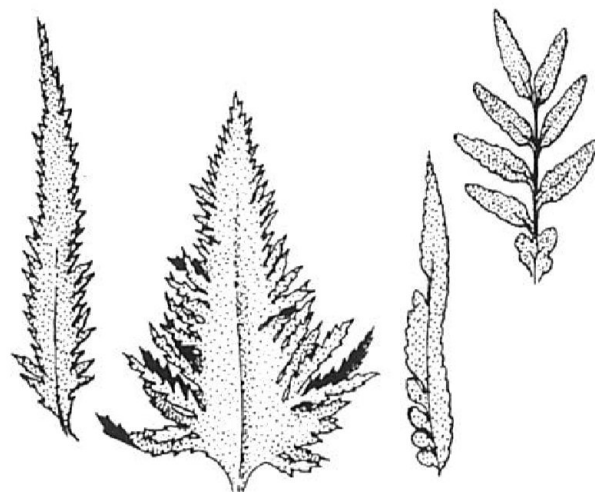

Take note that this is my personal summation for growing these ferns in the Adelaide area, and therefore should be adjusted to suit the individual conditions and requirements of your particular area.

Hoping that this article can be of some assistance with the growing of Drynarias.

My Epiphytic mix for Drynarias

1 part Tree Fern Fibre
1 part Pinebark 10-15mm
1 part Charcoal 10-15mm
1 part Peanut Shells
half part Sphagnum Moss
half part mulched Oak Leaves to which I add, of your choice.
Rapid Raiser or Dynamic Lifter or Ultraflora 2000, using your own discretion as to the quantities, as conditions and requirements differ from area to area.

RON ROBBINS

Reprinted from newsletter September, 1985

ADIANTUM CAUDATUM (trailing maidenhair fern)

A tender fern native to tropical regions. It occurs in limestone areas and prefers good drainage. Bulbils form on the tips of mature fronds and if pegged down soon take root to form a new plant. The pendulous habit of this fern makes it ideal for hanging baskets.

Drawing by Barry Stagoll can be found on page 92

OCTOBER 2008 MEETING

CATEGORY Blechnum

1st	John Hodges	Blechnum braziliense
2nd	Gay Stagoll	Blechnum contiguum
3rd	Gay Stagoll	Blechnum articulatum

We regret that the August results have been mislaid.

Above information was supplied by Barry Stagoll, thanks Barry.

FROM THE SHOW BENCH OCTOBER

By Don Fuller

The competition category for the October meeting was the genus *Blechnum* and there was a good selection of species displayed.

Blechnum articulatum This fern, which is found in NE Qld, displayed some bright red foliage for which it is renowned. (Gay Stagoll □ 2nd place).

B. brasiliense (Brazilian Tree Fern) This fern which comes from S America, was an excellent specimen with colourful new foliage. One problem with this fern is as they grow bigger there is a tendency for the caudex to become unsteady in the pot. (John Hodges - 1st place).

B. cartilagineum (Gristle Fern) This fern is the only Victorian *blechnum* which is not dimorphic. Has good colour if grown in a high light situation.

B. contiguum This is an attractive fern from LHI where it grows in the mountain cloud mist zone as an epiphyte. (Gay Stagoll - 3rd place)

B. discolor This hardy fern from New Zealand is usually found in wet boggy ground.

B. filiforme This is an interesting climbing fern from New Zealand. It commences life as a terrestrial with almost round pinnae. As it develops and begins to climb the pinnae change shape and become long and narrow. It also then becomes dimorphic developing long very thin fertile fronds. It will not become fertile whilst growing on the ground.

B. glandulosum

B. indicum (Swamp Water Fern) This swamp loving fern is found from Nth NSW to the top of Australia. It is one of the few Australian *blechnums* which is not dimorphic.

B. inflexum This fern is from Africa.

B. sp from New Caledonia.

B. nudum (Fishbone Water Fern) and *B. nudum* crested. *B. nudum* is one of the most common ferns in eastern Australia where it grows in damp areas.

B. occidentale A tropical American fern which has become naturalised in Nth.Qld

B. wattsii (Hard Water Fern) Another fern with good bronze colouring on the new foliage.

AUSTRAL FERNS

Wholesale Propagators.

MERRY CHRISTMAS AND A HAPPY NEW YEAR

*The President and Committee Members of the
Fern*

*Society of Victoria would like to take this opportunity
to thank all our members for their support throughout
2008. We look forward to serving the members with a
bigger and brighter 2009.*

*We wish all our members and
their families a happy and pros-
perous Christmas and New Year.
we look forward to
seeing many of you throughout the
coming year.*

Spore List

Fern spore is free to members of the Fern Society of Victoria who donate spore. Otherwise the cost is members 20 cents per sample, non-members 50 cents, plus \$1.00 to cover postage and handling. Available at meetings or by mail from Barry White, 34 Noble Way, Sunbury, Vic. 3429 Australia, Ph. (03) 9740 2724.

There is no charge for spore for overseas members, however to cover postage two International Reply Coupons would be appreciated; or alternatively spore may be exchanged. International Reply Coupons can be purchased at most Post Offices. There is a limit of 20 packets per order. As some spores are in short supply please include alternatives.

Dicksonia fibrosa 10/07
Diplazium australe 4/08
Diplazium dilatatum 8/06
Dryopteris affinis 'Cristata' 12/06
Dryopteris crassirhizoma 3/06
Dryopteris filix-mas 11/06
Dryopteris sieboldii 12/06
Dryopteris wallichiana 3/08

Hypolepis rugosula 2/07
Lastreopsis acuminata 3/08
Lastreopsis decomposita 12/06
Lastreopsis glabella 4/07
Lastreopsis hispida 11/06
Lastreopsis marginans 1/07
Lygodium japonicum 9/07
Oreopteris limbosperma 08/06
Pellaea sagittata 3/07
Platycerium bifurcatum 'Fosters No 1' 10/07
Platycerium bifurcatum 'Hula Hands' 10/07
Platycerium bifurcatum 'Venosum' (Mt.Lewis) 0/07
Platycerium hillii 12/06
Platycerium veitchii 10/07
Pneumatopteris sogerensis 3/08
Polypodium formosum 10/07
Polypodium interjectum 3/08
Polystichum aculeatum 06/06
Polystichum australiense 3/08
Polystichum formosum 3/08
Polystichum proliferum 4/06
Polystichum retroso-paleacum 10/6
Polystichum setiferum 07/06
Polystichum setiferum 'Congestum' 12/07
Polystichum tsus-simense 3/06
Polystichum vestitum 2/07
Polystichum xiphophyllum 3/08
Pronephrium asperum 2/07
Pteris biaurita 3/08
Pteris cretica 'Wimsettii' 1/06
Pteris hendersonii /06
Pteris quadriaurita 3/07
Pteris sp. (Nepal) 3/07
Pteris umbrosa /07
Pyrrosia lingua 'Variegata' 5/06
Rumohra adiantiformis (Cape form) 2/08
Rumohra adiantiformis (Native) 4/06
Stenochlaena palustris 2/07
Thelypteris navarrensis 1/07
